

Recording compression tester Petrol -SPCS-15

Product Code: 916 000 00

Availability: In Stock

Short Description

Art. 916 000 00

Description

Recording compression tester Petrol -SPCS-15

(with measurement registration - version for petrol engines)

The meter is equipped with a basic set of measuring tips (adapters) terminated with conical pressure bands in the spark plug hole. With this set of adapters, you can measure compression in a large range of petrol engines. We offer a wide range of different types of adapters, which can be purchased separately.

Measuring Range: 0.3 to 1.5 MPa (3 to 1.5 bar)

COMPRESSION PETROL - Adapters

All adapters - see page 20 of the Catalog

The results of measurements are recorded on the diagram in which the meter is equipped.

In one diagram you can save 8 results of compression pressure measurements in the cylinders of the petrol engine.

In our offer we have appropriate diagrams packed in 100 s. - Articles 916 105 00

Spare conical erasers - 5 items - Art. 916 020 00

To use the adapters screwed in place of the spark plug, use Reduction of art. HP 916 110 00

Screw-in adapters for gasoline engines - see page 20 in the HP catalog.
