

Uniwersal V Belt disassembly and assembly tool (V Belt / Stretchy Belt) Nylon

Product Code: 904 123 50

Availability: In Stock

Short Description

Art. 911 123 50

Description

Universal tool for assembly and disassembly of V-belts - Made of fiber reinforced plastic (NYLON)

The instruments are very helpful when removing and installing V-belts on pulleys. The application of one device to the pulley during the rotation of the wheel causes the tensioned belt to slide down, the second device causes the belt to slide on the wheel when the wheel is rotated

The belt disassembly and assembly operation is almost impossible without the help of tools, the amateurs try to help themselves with a screwdriver or other piece of sheet metal, which may cause damage to the pulley or belt
