Fuel Injection System

Common Rail high pressure

## Description

Measurement kit high pressure for Common Rail systems.

**Manometer glyceric pressure gauge in stainless steel with measurement range 0 to 2500 bar**

Applicable the instrument allows:

- measurement of pressure Common Rail pump,
- Measuring the system pressure during engine operation,
- Tightness control of the injection system and injector.

The device has a vent valve Measuring system.

Specifiation:

- Manometer glyceric 2500 bar 919 610 10
- Reinforce tees with vent 919 600 50
- Hose connecting (2 pc) 919 600 20
- Connector M12/M12 (2 pc) 919 600 30
- Reduction fuel tube M12/M14 (2pc) 919 600 41
- Reduction fuel tube M12/M12 919 600 42
- Deaeration hose 919 600 22

Packaging - plastic suitcase.
