

Oil Pressure Tester - for automatic gearboxes

Product Code: 914 800 00

Availability: In Stock

Short Description

Art. 914 800 00

Description

The device is designed to measure oil pressure in automatic transmissions.

The measurement is made by connecting the sampler manometer with measuring tips of the appropriate thread size screwed into the gearbox control hole (in a set of 7 measuring tips).

Measuring range: 0 to 2.5 MPa (0 to 25 bar)
