

Compression pressure tester with measurement record and connections for SPCS - 50 SK quick release couplings

Product Code: 912 200 00

Availability: In Stock

Short Description

Art. 912 200 00

Tester with quick release connections

Description

Compression pressure tester for Diesel Engines with measurement record and connections for quick couplings **SPCS - 50 SK**

In the sampler, threaded connections were replaced with quick couplers, which greatly simplifies and speeds up the measurement. The electric connector built into the probe handle allows one-person operation device service. The measurement takes place by replacing the sprayer, injector or glow plug with the appropriate measuring tip (adapter).

10 - 50 bar (1.0 - 5.0 MPa)

Adapters for Diesel engines - see page 9-17 in the HP Catalog.

- Compression measuring instrument with an equipped handle in the starter switch and the vent valve (drain) 912 201 00
- Pressure hose with non-return valve, length 360 mm 912 202 00
- Adapter (measuring tips) replacing sprayer: A, B, D, E, F 912 011 - 016 00
- Electric wires for starting the engine 912 404 00
- angle connector M12 x 1,5 SK 912 203 00
- angle connector M14 x 1,5 SK 912 204 00
- quick-clamping reduction M12 x 1.5 SK 912 205 00
- quick-change reduction M14 x 1.5 SK 912 206 00

- Registration diagrams 100 pieces 609 195 00
